

INDONESIA OCEANS PROGRAM INTERNAL REPORT

July-September 2021

Highlights of the month:

Workshop on WORK PLAN
Preparation and Synchronization
of Adat Institution in Wakatobi

(Pg. 4)

Formation of the Heole-Olea
Team as MHA Kawati partner

(pg. 5)

Establishment and legalization of
Surveillance adat community
group in Bhs

(pg. 6)

The Nature Conservancy Vision and Mission

www.nature.or.id

OUR MISSION

The mission of The Nature Conservancy is to conserve the lands and waters on which all life depends. Together, we promote the value of nature and catalyze transformational change in conservation and sustainable use of natural resources for the benefit of people and nature.

OUR VISION

Our vision is to leave a sustainable world for future generations.
A prosperous Indonesia where the needs of people and the sustainability of nature are in balance for today's and future generations.

TNC I-COP 2020 GOAL:

Transform management of 10 mio ha of Indonesia's coastal & marine resources to advance sustainable development and climate change adaptation.

How do we achieve our goal?

PROTECT

Demonstrate effective biodiversity conservation in 10 mio hectares, and leverage to additional 2 mio hectares.

TRANSFORM

Partnering with government, community and private sectors to demonstrate sustainability in at least three types of economic activity in coastal area (fisheries, tourism, mariculture)

Promote integrated management & spatial allocation at ecoregion/seascape level balancing economic interests – conservation – climate change adaptation in 20% of Indonesian waters & EEZ.

INSPIRE

Building constituencies and future leaders of conservation from the private sectors and public in at least 60 villages across 18 districts.

STRENGTHENING KULATI VILLAGE WOMEN'S GROUP

IOP Strategy:	Blue Economy
Detail location:	Tomia
Funding Source:	INDO YTNC Nat Ocean Practice – P104880 INDO Marine Pollution - I10650
Reporting type:	Activity Report
Partners:	Klp Perempuan Desa Kulati (Padatimu Toasoki), Wakatobi Sintasu, Poassa Nuhada, Pemerintah Desa Kulati.

*Women's Group Meeting
(Photo: Sri Hastuti/Wakatobi Sintasu)*

A. Legalization of Kulati Women Group

On July 3, 2021, a meeting was held as an initial stage to strengthen the women's groups capacity in Kulati Village.

Participants agreed upon these points in the meeting:

- The group name is "Padatimu Toasoki".
- The members of this women's group are representatives of the Poassa Nuhada group, elements of the village apparatus, PKK, and the Kulati Village community.
- The group will produce Simba Fish Chips using the tagline "Tommosina" (which means: liked by many people).
- The group legalization is in the form of a village head decree, which was compiled and signed at this meeting.
- The Head of Kulati Village shows his support for the group members, and advice the group to work with Bumdes Potapaki for product marketing in the future.

B. Product Sanitation and Hygiene Training

On 16-17 July 2021, Sanitation and Hygienic Basic Training activity were carried out as one of the stages in increasing the Padatimu Toasoki women's group's capacity in Kulati Village, especially in raising the group's awareness, regarding:

- maintaining food product hygiene and sanitation,
- avoiding contamination caused by bacteria, insects, or other animals.

C. Socialization about sustainable coastal and marine resources utilization for women group in Tomia and Kaledupa

On 21 August and 25 September, socialization was done in Tomia and Kaledupa, respectively. Women have an essential part in the sustainable utilization of natural resources through good household financial management and avoiding consumptive behavior. The participants also learn about coastal ecosystem types and their function for people in coastal areas, highlighting the importance of conserving nature.

MANGROVE PLANTING IN COMMEMORATION OF WORLD MANGROVE DAY AND ROAD TO HKN_2021

On July 28, 2021, a mangrove planting event was initiated by BTNW in commemoration of World Mangrove Day and preparation for National Nature Conservation Day (Road to HKN 2021) that was focused on the coast of Liya Onemelangka Village.

On this occasion, the Regent of Wakatobi conveyed and hoped that the Wakatobi local community could play an active role in maintaining the sustainability of mangrove in Wakatobi, apart from the Biosphere Reserve area, mangrove planting activities must be sustainable, not only on Wangi-Wangi Island but also on other islands.

This activity aligned with the long-term development vision of Wakatobi Regency for 2021-2026, namely Wakatobi becoming a Peaceful Maritime Conservation Regency.

2021 ANNUAL WORKPLAN TIMELIENE BETWEEN BTNW AND YKAN

IOP Strategy:	Oceans Protection
Detail location:	Tomia
Funding Source:	INDO Ocean CBRM – PI 16868 INDO Peierls Wakatobi - 110127
Reporting type:	Activity Report
Partners:	BTNW, Komunto

BTNW and YKAN held a discussion regarding annual workplan in the RKT BTNW – YKAN 2021 on 9 and 12 August 2021. The meeting objective is to follow up with the Head of BTNW on each islands (SPTN 2-Kaledupa and SPTN 3– Tomia & Binongko) and discuss a joint guideline as a reference in implementing activities based on the agreed timeline.

RKT Workplan will be collaboratively implemented based on BTNW SPTN Territory with:

- BTNW—SPTN 3 (Tomia-Binongko): Komunto, BTNW, and YKAN
- BTNW—SPTN 2 (Kaledupa): Sara Barata Kahedupa, Forkani, BTNW, and YKAN.

WORKSHOP ON WORK PLAN PREPARATION AND SYNCHRONIZATION OF ADAT INSTITUTION IN WAKATOBI

IOP Strategy:	Ocean Protection
Detail location:	Tomia & Kaledupa
Funding Source:	INDO Ocean CBRM – P116868 INDO Peierls Wakatobi - 110127
Reporting type:	Activity Report
Partners Tomia:	MHA Kawati Pulau Tomia, BTNW, UPTD Perikanan Tomia, Muspika, Komunto, Nelayan.
Partners Kaledupa:	Barata Kahedupa, BTNW, DanRamil Kaledupa, Polsek, Kepala Desa, Forkani, Pemerintah Kecamatan

These workshops was held to support the sustainable management of coastal and marine resources in Tomia and Kaledupa through Adat institutional strengthening and preservation of local wisdom.

A. Sara Adat Kawati (Tomia) Work plan

On August 3, 2021, The workshop agenda was to synchronize Sara Adat Kawati Tomia (Indigenous communities on Tomia Island) and BTNW (Wakatobi National Park management) work plan .

These are the workshop discussion highlights:

- Sara Adat Kawati work plan : conservation of Ole Fish through sustainable fisheries, monitoring, and coastal surveillance.
- Several Sara Adat Kawati program already aligned with BTNW program, related to:
 - Adat-based monitoring and surveillance,
 - protection of coastal ecosystems

Sara Barata Kahedupa Workplan Workshop
(Photo: La Ode Arifudin/YKAN)

- Tomia Island Fisheries Task Force (UPTD) focuses on synchronizing the Ole Fish monitoring and surveillance program in Tomia.

B. Sara Barata Kahedupa Work plan

On August 11, 2021, the Sara Barata Kahedupa Workplan Preparation and Synchronization workshop was participated by Muspika, BTNW, UPTD Fisheries of Kaledupa Island, and village heads.

The meeting concluded that:

- several work programs related to BTNW required enforcement:
- coastal protection
- sand utilization for the government construction projects following the 2014 Regent's Regulation on the Prohibition of the use of local sand.

To Follow up:

- The agreement in this meeting will be outlined on the Agreement Miinutes.
- The Agreement Minutes will be followed up and coordinated with the Wakatobi Regency government as a policymaker.

FORMATION OF THE HEOLE-OLEA TEAM AS MHA KAWATI PARTNER

The formation of the Heole-Olea Team was carried out on August 14, 2021, as a follow-up after establishing the Declaration that describe Procedures for Catching and Management of Ole Fish in the Kawati Indigenous Territory of Tomia Island on November 17, 2020.

On this occasion, the Head of SPTN 3 Tomia – Binongko said that Heole-Olea did not prohibit Ole Fish's capture but ensured the species sustainability due to the indications that show the population is starting to decrease.

The traditional leaders warn that starting from this fishing season, the appropriate fishing method using recommended net size needs to be socialized to encourage people to fish sustainably and counteract the decreasing Ole fish population.

WORKSHOP ON PREPARATION OF ADAT-BASED MONITORING AND SURVEILLANCE SOPS

On 19 August 2021, approximately 22 stakeholders attended the workshop to prepare the Adat-Based Monitoring and Surveillance SOPs and training for Sustainable Ole Fish management. The participants were BTNW, MHA Kawati Tomia Island, UPTD Fisheries, Tomia, East Tomia District Governments, Military, Police, community leaders and fishers, and Komunto as field companions partners.

The discussion of the SOP draft from the BTNW emphasized the importance of conservation and sustainable use of natural resources in coastal areas. In addition, The Fisheries UPTD recommended the appropriate size of the fishing net. The MHA Kawati Tomia Island welcomes this initiation. They express gratitude for the support to ensure the conservation of Ole Fish resources and sustainable use by the fishermen.

ESTABLISHMENT AND LEGALIZATION OF SURVEILLANCE ADAT COMMUNITY GROUP IN BHS

IOP Strategy:	Oceans Protection
Detail location:	Waisai
Funding Source:	
Reporting type:	Activity Report
Partners:	FFI BKKPN Kupang Satker Raja Ampat POLAIRUD BLUD UPTD Raja Ampat Yayasan Nazaret Papua Barat PSDKP DKP Provinsi Papua Barat DAS Maya DKP Raja Ampat BKKPN Kupang Satker Raja Ampat

On September 9, 2021, the meeting was participated by 20 (4 female, 15 male) stakeholders representatives from institutions responsible for preventing IUU Fishing practices on Misool waters territory. Participants agreed upon these points in the meeting:

- The first session discusses the issues and challenges still happening in the Bird Head Seascape, based on observation from the BLUD UPTD Raja Ampat, namely:
 - Destructive and illegal fisheries
 - Violation of Marine Protected Area (MPA) zonation utilization
 - Catchment of rare, endangered, and protected marine life
 - Placement of anchors and vandalism.
 - Surveillance and enforcement activities
- The 2nd session talks about Adat-based surveillance name Jaga Laut developed by Yayasan Nazaret Papua Barat (YNPB), encompassing the daily community patrol activities and positive outcome which is 50% decrease of IUU fishing practices in the area.
- From the discussion, the participants agree with this list of activities as a follow up:
 1. Consolidation with Northern Misool Jaga Laut team to develop the institutional structure.
 2. Legalization of the Jaga Laut team.
 3. Knowledge gap assessment for each Jaga Laut personnel to formulate appropriate capacity building training
 4. Basic training for Jaga Laut groups which will later be participated in the development of MPA in Northern Misool waters.
 5. Establish a Sanction coordination forum for IUU Fishing practices in West Papua.

SOCIALIZING SIGAP RAJA AMPAT IMPLEMENTATION PLAN WITH THE PARTNERING R4 GOVERNMENT INSTITUTIONS

On 13-15 September 2021, YKAN conducted a series of meetings with several Raja Ampat Government Agencies to update SIGAP implementation and Action Plan in Raja Ampat.

Output from the meeting:

- **Raja Ampat Fisheries Agency (DKP)**
 The fisheries agency will develop a Joint Work plan with YKAN to synchronize DKP and YKAN programs and collaborative action plans.
- **Raja Ampat Tourism Agency**
 The tourism agency will develop a Joint Work plan with YKAN to synchronize both DISPAR and YKAN program collaboration that both will evaluate annually.
- **Raja Ampat Cooperative and Small-Medium Business Enterprises Agency**
 Will conduct site visit to identify a specific program for the Joint Work Plan. YKAN will develop a Cooperation Agreement (PKS) with Raja Ampat Cooperative and Small-Medium Business Enterprises Agency before developing the Joint Work Plan. The government will assign a staff to assist and support YKAN community livelihood improvement programs on the field.

THREE MONTHLY ONLINE MEETING WITH BKKPN KUPANG

IOP Strategy:	Oceans Protection
Detail location:	Online
Funding Source:	
Reporting type:	Activity Report
Partners:	BKKPN Kupang

In July 2021, YKAN gave an update about the YKAN Work Plan in Savu Sea Marine National Park, especially on expanding YKAN worksites to Sabu Raijua Agency.

BKKPN Kupang recommends village options as a potential village that need assistance. YKAN chose six new villages to implement the Sustainable Seaweed Aquaculture Program: 3 villages in Hawu Mehara and 3 villages in Sabu Liae. To follow up, YKAN will introduce YKAN's ongoing program to the Sabu Raijua Regent and Sabu Raijua Fisheries Agency.

COMMUNITY GROUP ASISTANCE

Strengthen group capacity

In July 2021, to strengthen the group capacity and reactivate the group solidarity series of training were conducted, namely:

- utilizing the surrounding yard for alternative livelihood
- Group Saving and financial management
- Four groups in Mbueain already have a group saving and will be put in a bank after the group legalized formally through the Village Head Decree

Monitoring Seaweed Aquaculture

The post-cyclone disaster in the Savu Sea, seaweed aquaculture in Tonga Beach, Mbueain Village has returned to normal. Although, some anomalies (i.e. 40% dwarfed and slower to grow, fragile thallus, white spots/tips) were observed in the harvested seaweed due to sea urchin population, affected by the abandoned seaweed plots, and low tide during the dry season.

To adapt to the low tide condition, most farmers moved the seaweed plot to a deeper area in Be'e village. The farmer worried about the limited time to select a good seedling according to recommended procedure. To anticipate this, the seaweed farmer group needs assistance support and establish collaboration with other seaweed farmer groups in other areas to ensure sustainable access to seedling, improve seed quality, and expand product marketing. For the next two months, Pelita Kasih will continue their assistance.

Carrageenan Test

The test was done in Laboratory in Kupang for samples from 3 villages: Mbueain, Tesabela, and Sulamu Village.

Legalization of Seaweed Farmer Group

Three groups are already legally registered and have received a Village Head Decree. Namely: Assisted Group in Oelolot Village (Setia Usaha, Berkat harapan , and Ita Esa) and Mbueain village (Berkat Usaha)

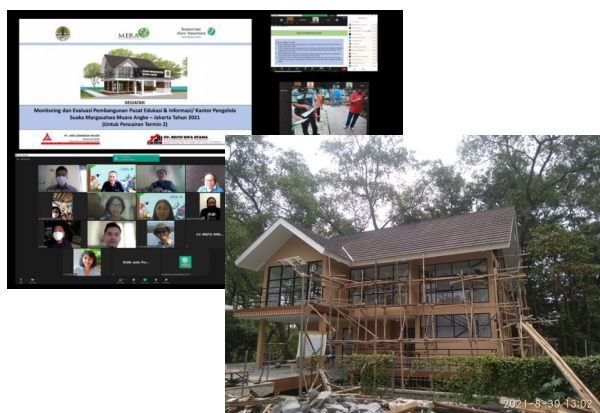

Product Marketing

Currently, Online or Offline marketing for seaweed products is still not implemented. The re-assessment was done to identify the UpToDate condition regarding the potential product, the group preparedness (facilities, motivation, interest, feasibility), program sustainability, and business marketing strategy. Here is the assessment result:

- 3 out of 4 group still Interested with the seaweed product business (Kelompok Berkat Usaha-Mbueain and Kelompok Setia Usaha-Oelolot)
- four types of seaweed product identified: Bolu Kukus, Bolu Bakar, Syrup, and ginger candy) which is commonly consumed there.
- The group also want to certify the product (PIRT) and research new product to reach a wider market.
- The marketing strategy is based on purchased orders and direct selling at the market.
- YKAN already facilitates the group with production tools and training to increase the product quality and work system.
- 11 Key members from 3 groups were selected as business actors to ensure daily production.

MERA-SMMA PROGRESS

IOP Strategy:	Oceans Resilience
Detail location:	APP, Djarum, Chevron
Funding Source:	
Reporting type:	Activity Report
Partners:	BKSDA Jakarta

On August 2021: The 1st step of water canal construction is finished with total length 33 meter.

- Developing 2021 Restoration Annual Activity Plan with BKSDA Jakarta

A. Monitoring and evaluation of the Construction of education/information centre and educational facilities (SMMA Management Office)

The construction is in accordance with the master plan design. Project progress:

July Progress

- Overall reaching 54,76% progress completion.
- Education Centre construction reaching 75%

August Progress

- Overall reaching 78,79% progress completion.
- Education Centre construction reaching 90%

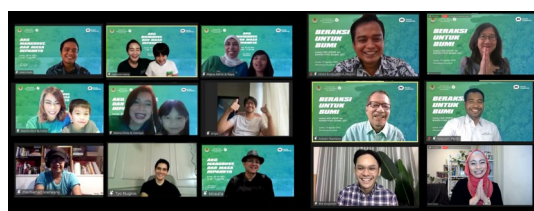

September Progress

- Monitoring evaluation on 17 September 2021, progress 100% according to contract

B. SMMA Mangrove restoration

- Water canal construction
On July 2021: YKAN, BKSDA Jakarta and consultant held a meeting to discuss Water canal design, construction process, materials, and administration aspect to ensure the construction run smoothly.

C. Raise Public Awareness about Mangrove Conservation

- On 30th July 2021 YKAN conducted Virtual event called *Conservation Dialogue: Me, Mangrove, and its future* to talk about the importance of mangrove for our lives, especially SMMA which is one of the last remaining mangrove ecosystem in Jakarta.
- On 27 August 2021, another Conservation Dialogue about Action for Earth, as Misi Lestari (virtual charity run) series of event.
- Develop 3d animation video about the SMMA education centre

JULY 2021 MERA-SEMARANG PROGRESS

Strengthening the community economy through SIGAP approach

A. Koperasi Serbaguna Raharjo Mandiri

Packaging and marketing the mangunharjo community top product (shrimp crisps and batik mangrove pattern). Some activities are pending due to covid 19 restriction that prohibit mass gathering, such as group meeting.

IOP Strategy:	Oceans Resilience
Detail location:	APP, Djarum, Chevron
Funding Source:	
Reporting type:	Activity Report
Partners:	BKSDA Jakarta

B. Batik Mangrove production

The community has produce 10 sheets of batik. There are two certified batik maker that is trained by batik competency assessor.

C. Shrimp Crisps

The community has produce 40 kg of shrimp crisps. Meanwhile, marketing was done by the Koperasi

AUGUST 2021 MERA-SEMARANG PROGRESS

A. RPE Implementation

Training for Mangrove planting and seedling at Mangunharjo sub-district

On 6-7 September 2021 training in form of inclass lecture presented by Dr. Rudi Pribadi (UNDIP), Sururi (local community) and Yusuf Fajariyanto (YKAN), as well as field practice

B. Strengthening the community economy through SIGAP approach

- Digital Marketing Training conducted to support koperasi to understand product standard quality that is acceptable for online marketing and administration procedure. Trainer facilitator is from Blibli.com, Agus Pribadi. The community plan to upload product to online market on 10 October 2021 at the latest after completing the product quality standard and administration process.
- Sustainable pond aquaculture August – September 2021 — Maintenance of tilapia and tiger prawns in the Kalisantren Group by giving probiotic treatment and extra feeding based on monitoring the fish weight

IOP Strategy:	Oceans Resilience
Detail location:	APP, Djarum, Chevron
Funding Source:	
Reporting type:	Activity Report
Partners:	BKSDA Jakarta

September 2021 — Harvest

Harvesting based on recommendation from BBPBAP Jepara expert, based on the tilapia and shrimp body size

- Tilapia : 3-4 individual per kg; total 468 kg
- Shrimp : 30 individual/kg; total 67 kg

C. MERA program implantation result workshop

On 13 September 2021 the workshop to share MERA Program result in Semarang and exit strategy plan.

D. Mangrove potential survey in Pati and Rembang

The survey team assess the institutional, economic, and forest ecological condition and potential.

Survey was conducted in:

- Pati, 6 coastal villages at 9 September 2021
- Rembang, Tireman Village and Banggi Market at 10 September 2021

External Affairs

Writer: Arisetiarso Soemodinoto

EXTERNAL AFFAIRS ACTIVITIES WITH MMAF, MOEF AND PROVINCIAL GOVERNMENTS

Activities under this theme were:

July 2021

- Review of draft cooperation agreement (PKS) between YKAN and provincial government of Papua Barat
- Attend discussion on plan for courtesy call with MMAF Director of Fisheries Resource Surveillance (PSDP) on the next APEC working group meeting on fisheries and IUU fishing
- Participate in online meeting on “Konsultasi Publik 2 Rencana Zonasi Kawasan Antar Wilayah Laut Bali” organized by MMAF Directorate PRL
- Participate in online meeting on “Konsultasi Publik 2 Rencana Zonasi Kawasan Antar Wilayah Laut Selatan Jawa, Bali dan Nusa Tenggara” organized by MMAF Directorate PRL

August 2021

- Review of (1) “Naskah Akademik Pemanfaatan Kawasan Konservasi Perairan/Laut di Papua Barat”; (2) translation results of KB with MMAF, and PKS with DJPT/DGCF; and (3) status of draft MoU between YKAN and provincial government of West Papua.

BLUE ACTION FUND/BAF-SUPPORTED PROJECT IN BHS

August 2021

Virtual meeting to discuss:

- the objectives of vulnerability assessment under BAF project;
- draft guidelines for YKAN|BAF project steering and proposal selection committees;
- Grievance Mechanisms for BAF project implementation;
- “proposal ESMS dan vendor pengadaan fasilitas” with UNIPA;
- reservation of candidate of Maksegara MPA, and program development in Kofiau;
- BAF-MACP budget allocation and harmonization; and
- “Pemaparan dan Diskusi Hasil Monitoring Sosial UNIPA di KKP Kofiau Boo” by UNIPA;
- “community partners’ activity progress report” template; template of community proposal for funding from BAF-YKAN Program in BHS, and requirements

IOP Strategy:	Various IOP Strategy
Detail location:	Work from Home (Bandung)
Funding Source:	PI00257 – INDO YTNC Integrated Ocean Management
Reporting type:	Activity Report
Partners:	MMAF, MoEF, Provincial governments

- Virtual meetings (1) to discuss “PKS YKAN dengan Pemkab Wakatobi”; (2) on “Pembahasan Budget Operasional Staff lapangan BBKSDA Papua Barat dan Mitra Lainnya”; and (3) to discuss potential funding for Maksegara MPA and secured funding for support MHA Malaumkarta.
- September 2021
- Participate in preparation of
- Conservation and Tourism Development of Salt Lakes in Berau” (organized by YKAN jointly with Tourism Service Office (Dispar) of Kalimantan Timur Province dan Berau Regency;
- Draft Mutual Agreement between YKAN and Sorong, West Papua and Wakatobi Government

IOP Strategy:	Various IOP Strategy
Detail location:	Work from Home (Bandung)
Funding Source:	PI00257 – INDO YTNC Integrated Ocean Management
Reporting type:	Activity Report
Partners:	MMAF, MoEF, Provincial governments

for appraisal.

- Discussion on Review of BAF|YKAN project steering committee, and grantees selection committee;

Document preparation:

- official response to comments on interim progress report of Q1Q2 2021, and FAR for Q3Q4 2021;
- Review of ToRs for formation of community surveillance groups in Waisai and Malaumkarta under BAF project;
- Prepare list of baselines, endlines and other data measurement of BAF project’s activities, and send out to respective members of the team;

Internal Training:

- “Panduan Dana Hibah” for BAF project partners;

September 2021

Participate in virtual discussion:

- “community surveillance groups (pokmaswas), and TURF-reserve concept & application” to facilitate BAF project partners and community beneficiaries;
- preparation and coordination meeting for BAF project in BHS, and Raja Ampat team activities update;”

Prepare/review documents:

- list of baselines, endlines and other measurements for implementation of activities under BAF project;
- Participate in zoom meeting on “Review of BAF|YKAN project steering committee, and grantees selection committee guidelines;

- Review, revise and approval for CFS Yayasan Nazaret Papua (under BAF project);
 - Review and revision of BAF|YKAN project steering committee, and grantees selection committee guidelines;
 - Submit interim progress report of Q1Q2 2021 and FAR Q3Q4 2021 to BAF;
 - Prepare powerpoint (ang talking points) for Will McGoldrick meeting with BAF Germany;
- Facilitate / participate in training:
(a) community strategic planning, and (b) TURF/PPBM, for Sorong field station team; financil management training for UNIPA

ADDITIONAL SUPPORT REGARDING , CONSERVATION PLANNING; MPA MANAGEMENT AND EFFECTIVENESS EVALUATION; PROPOSAL PREPARATION

July 2021:

Attend zoom meeting to discuss :

- coral reef restoration design for Maratua Island
- SCA progress review
- Asia-Pacific Oceans Team: Establishing “Skills Squads”
- climate/connectivity modeling
- SIGAP workshop preparation

Norad Call for proposal:

- Norad Call for Proposals: Civil society in a sustainable and inclusive ocean economy (2021/2022-2024)”
- Norad Oceans call for proposal check-in zoom meeting with TNC WO and Africa teams
- Norad Oceans call for proposal check-in zoom meeting with TNC WO and Africa teams
- Virtual discussion on Norad proposal with Trish Kendall
- Prepare IOP draft proposal for Norad & result framework

Virtual interview

- Sustainable Practice Senior Manager candidate
- six AP Conservation Partnership Director candidates

Develop strategic documents

- draft coral restoration plan for further internal discussion
- Quick review of TURF draft paper produced by consultant hired by TNC Global Marine Team
- Review and comments on Reef Refugia (Super Reef) mapping 1-pager
- Review and rectify planning table for coral restoration in Maratua for requesting funding from MARS-SHEBA
- Populate and submit dashboard FY2022 of BAF
- Finalize draft Results Framework of proposed TURF-Reserves project for Norad proposal
- Continue ongoing preparation of proposal on “Generic Theory of Change for Conservation Strategies” to be submitted to Conservation Measures Partnership (CMP)

August 2021:

Proposal development

- Norad funding, including prepare narrative and budget for TURF-reserve section of Indonesia Oceans Program, review of proposal Theory of Change and project implementation

plan;

Data submission

- Collect and submit data and information from YKAN marine sites for “FY2021-2022 Lobbying Survey” by TNC WO;
- Prepare data for Public Funding Pipeline Review for BBCRM;

Online discussion

- Participate in the discussion of stakeholders of KSNT Maratua, workshop preparation of “Berau salt lake conservation and tourism development”.
- “Survey Groundruthing Coral Reef Restoration Maratua”
- Indonesian Oceans SCA Review;
- “Dampak Peleburan LPNK IPTEK dan Litbang/KL ke BRIN” (organized by Alinea Forum);
- “Diskusi Tata Waktu Pelaksanaan SIGAP on Site”;

Review Document

- Review of JD Government Relations Specialist for NTT Program;

September 2021

Zoom meeting:

- Coral Reef Rehabilitation project with MARS
 - Preparation of proposal to Norwegian Agency for International Development (Norad) – prepare the TURF+reserve component of the proposal;
 - Preparation proposal for Darwin Initiative, especially on the project logframe;
 - Preparation proposal for USAID Kolektif (konservasi laut efektif) project;
 - “Indonesia Oceans/Fisheries Fundraising plan Review Meeting;”
 - Participate in preliminary discussion on coastal resilience study for BAF and MACP;
 - Attend IOP (virtual) Gathering: Oceans Law
- Document development/review:
- GFCR concept note
 - review and harmonization of BAF, MACP and (potential) Norad funding;

Online Writer: Emira Fajarini

YKAN ONLINE WORKSHOPS

SIGAP monitoring and evaluation workshop

On 12 July 2021, SIGAP implementation monitoring and evaluation workshop was participated by 29 people from YKAN and conservation partners from IOP intervention sites.

The workshop was divided into 4 session

1. SIGAP implementation on sites: Wakatobi, Raja Ampat, Savu Sea, Berau, and Semarang
2. Integration with Climate Change Vulnare), and also 1 group at Mbueain village (Kelompok Berkat Usah) bility Assessment
3. Gender Integration
4. Village Spatial Planning
5. SIGAP compatibility with Community Based Fisheries and Community Based Tourism

The discussion identified SIGAP success story and challenges on each sites, as well as mapping integration of Climate Change VA, Gender, Spatial Planning, and Community-Tourism and Fisheries to be synchronized within SIGAP phases.

Coral Reef Insurance Workshop

On 2 September 2021, Coral Reef Insurance Workshop was conducted virtually. The workshop divided into two session: presentation & panel discussion.

Material Presentation session:

1. Coastal Disaster Risk for Coral Reef Indonesia — presented by Mizan Bustanul –Cerdas Antisipasi Risiko Bencana (CARI!)
2. Emergency Financing for Coral Reef Recovery after Disaster Events — Barli Suryanta –Institut Teknologi Bandung
3. Lessons Learned from the First Coral Reef Insurance study case in Mexico — Fernando Secaira –TNC Mexico

Panel Discussion was participated by Director of Institutional and Product of Non-Bank Economic Industry, Financial Services Authority (OJK) and Head of Fiscal Policy Agency (BKF).

Conservation and Tourism Development for Berau Marine Lakes Workshop

On 29 September 2021, as a collaboration with Berau Tourism Agency (Dispar Berau), YKAN and Dispar Berau organize a Workshop Discussion about Conservation and Tourism Development for Berau Marine Lakes Workshop. Inviting 26 various institutions that have a part in conservation and tourism management in Berau Marine Lake. Total of 80 participants attended this workshop.

The workshop was divided into three sessions: presentation, Q and A, and discussion.

Material Presentation from:

1. Anargha Setiadi (RCCC UI): From Palau to Kakaban—Tourism to conserver marine lake
2. Asri—Berau Tourism Agency: Sustainable Tourism Development in Berau Regency
3. Hendra Yusaran Siry—Sekditjen DJPRL, MMAF: Management Plan of KSNT Maratua and Sambit
4. Yunda Zuliarsih (KKP3K KDPS) — Sustainable Tourism Management Plan in KKP3K KDPS (Berau MPA)

The Discussion session output is a lists of follow up action plan and institutions in charge to ensure harmonization of conservation and tourism development in Berau run smoothly, namely:

1. formalized the administration flow system to receive permit for physical development in the area
2. Develop a Sustainable Tourism Management Scheme
3. Sustainable Finance Mechanisam
4. Marine Lake Management that is sustainable, legal, high quality ecotourism, and integrated
