BIRU FUND

Catalyzing Reef-Positive Enterprises and Community Infrastructure in Indonesia

Indonesia hosts approximately 16% of the world's coral reefs

Supporting food security, livelihoods, and coastal protection for millions.

The Missing Middle in Reef Finance

Pre-commercial risk

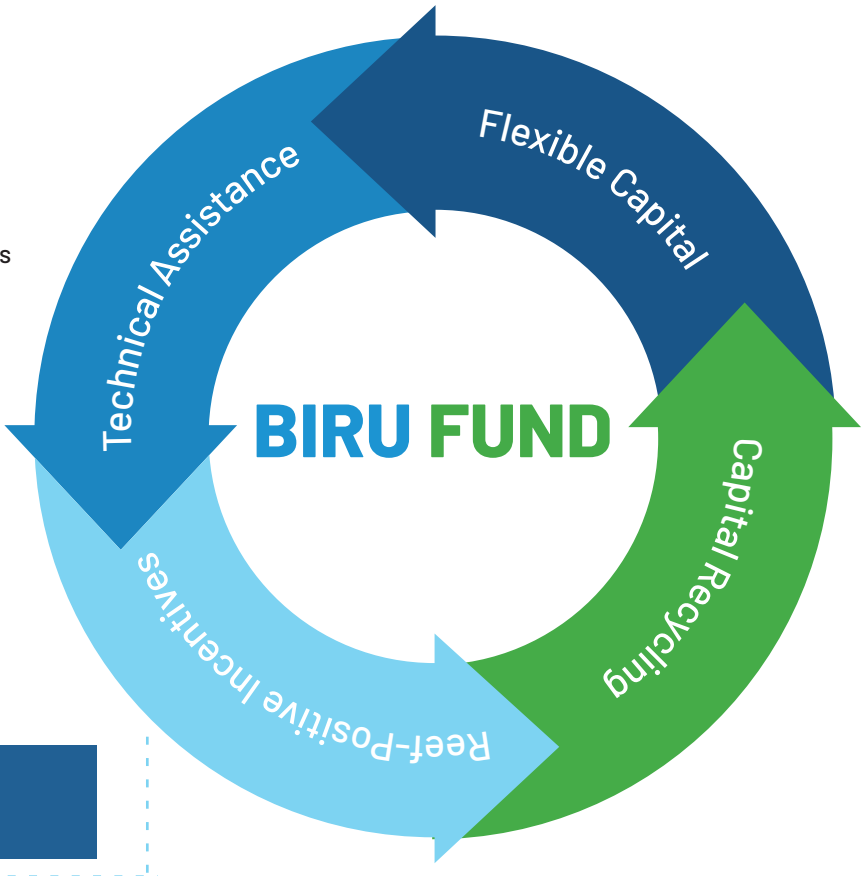

Too advanced for grants, too early for commercial

Infrastructure-heavy models

Require shared facilities that conventional finance rarely supports.

No capital recycling

Traditional grants end when projects end.

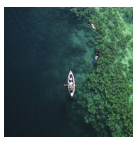

Investment Focus

- Sustainable Aquaculture
- Seaweed Value Chains
- Reef-Positive Fisheries
- Ecotourism
- Waste Management
- Blue Carbon Solutions

USD 50K-200K
Average Investment Ticket

Catalytic Investments

Berau Marine Protected Area

USD 47,314

Strengthening financing systems and governance for long-term MPA sustainability.

Sustainable Black Tiger Shrimp Hatchery

USD 66,114

Supporting sustainable aquaculture production and livelihoods.

Expected Impact

- Healthy Reefs
- Reef-Positive Practices
- Higher Household Income
- Local Jobs
